# PRINTING TECHNIQUES

1. SCREEN PRINT (Socks & Caps)
2. 3D EMBROIDERY (Snapbacks & Beanies)
3. DEBOSSING & EMBOSSING (Leather Wallets & Belts)
4. LASER ENGRAVING (Metal Buckles & Leather)
5. CHENILLE EMBROIDERY
6. SUBLIMATION PRINTING (Socks & Polyester Caps)
7. SILICONE / RUBBER GRIP PRINT (Socks & Gloves)
8. DTF PRINTING (Direct to Film)
9. 3D RUBBERIZED PATCHES (PVC)
10. RHINE STONES PRINTING

## OTHER TECHNIQUES

***FOIL VINYL STAMPING (Wallets & Premium Belts)***

*A specialized process where the accessory material is heated to a precise temperature and pressed against a custom metal die to create a lasting, raised 3D effect.It is the most reliable and trending method to showcase your brand logos on premium leather or fabric goods. This technique works beautifully on almost all accessory materials. Please note, there is a one-time development cost for creating the custom metal die.*

***HEAT-TRANSFER REFLECTIVE (Caps & Socks)***

*Also known as Reflective Vinyl or Silver Reflective, this is a high-tech technique for accessory decoration where a specialized reflective material is heat-pressed onto the surface to give it a glowing effect under light. We do this Heat-Transfer process in-house. The overall process involves a reflective film that is fused onto the fabric using precise heat and pressure. This makes the design stand out with a brilliant shine in low-light conditions, providing both a premium look and added visibility for your accessories.*

***DEBOSSED SUEDE PATCHES (Beanies & Wallets)***

*Debossing on Suede is a premium branding technique where your logo is pressed into high-quality suede material using a custom-made metal die. Unlike printing, this creates a sophisticated, recessed (sunken) effect that adds a rich, tactile feel to your products.This is the perfect way to add a high-end, classic dimension to your accessories and leather goods. It creates a visually stunning and durable finish that won't fade or peel, making your brand look elegant and professional.*

***REFLECTIVE PIPING & TRIMS (Caps & Beanies)***

*Reflective Piping & Trims is a specialized functional technique where light-reflecting strips or cords are integrated into the seams and edges of an accessory. This adds a sleek, high-visibility detail that glows brilliantly when hit by light.This process involves precision stitching where the reflective material is layered into the foundation of the product, such as the brim of a cap or the side panels of a bag. It is the perfect way to combine a modern, tech-wear aesthetic with added safety and visibility for your premium accessories.*

**1. SCREEN PRINT (Socks & Caps)**

*Screen Printing is a versatile technique in which specialized ink is pushed through a stenciled mesh screen to create a crisp and vibrant design. It is the most durable and cost-effective way to apply high-quality graphics onto premium accessories.Almost all types of accessory fabrics can be printed, offering long-lasting color that resists fading. Please note, there is a one-time setup fee for creating the custom screens for each individual color in your artwork, making it ideal for high-volume orders.*

**2. 3D EMBROIDERY (Snapbacks & Beanies)**

*3D Embroidery is a premium branding technique where decorative designs are created by stitching high-quality threads over a specialized foam layer to give the logo a raised, three-dimensional look. Using high-speed automated machinery, it provides the most sophisticated and long-lasting way to add bold logos to your headwear and accessories.This method offers a rich, textured feel that stands out prominently. Most premium accessories can be embroidered, and there is a one-time digitizing fee to convert your artwork into a professional, high-density stitch file.*

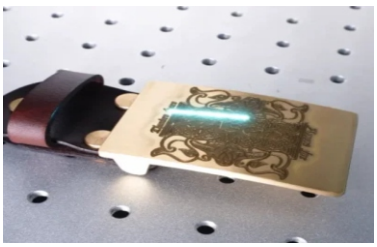

**3. DEBOSSING & EMBOSSING (Leather Wallets & Belts)**

*Debossing & Embossing are premium branding techniques used to create a permanent dimensional effect on leather and synthetic materials. Embossing raises the design above the surface, while Debossing presses the logo into the material to create a sophisticated recessed look.This is the most luxurious and durable way to add logos to your premium accessories. Unlike printing, these methods provide a high-end tactile feel that never fades or peels. It is highly efficient for leather goods and offers a clean, professional finish that enhances the overall value of the product.*

**4. LASER ENGRAVING (Metal Buckles & Leather)**

*Laser Engraving is a high-precision branding technique in which a concentrated laser beam is used to etch designs directly into the surface of a material. It is the most permanent and detailed way to create logos that will never wear off, peel, or fade away.This method is specifically designed for hard surfaces like metal buckles and organic materials like genuine leather. Since the laser removes a thin layer of the material to reveal the design, it provides a clean, professional, and high-end finish that is physically part of the accessory.*

**5. CHENILLE EMBROIDERY**

*Chenille is a specialized embroidery technique that uses a vaulted stitch to create a thick, 3D effect with a soft, carpet-like texture. It is a classic and trending way to add bold, fuzzy logos to premium beanies, headwear, and high-end accessories.While it works beautifully on heavy fabrics, it provides a unique tactile feel that makes your accessory designs stand out. This method requires a specific machine setup to loop the thread, and a one-time digitizing process is needed to ensure the plush, high-quality look is achieved perfectly for your brand.*

**6. SUBLIMATION PRINTING (Socks & Polyester Caps)**

*Sublimation is a high-tech printing process in which specialized ink is turned into gas under heat and pressure to bond directly with the material's fibers. It is the most permanent and breathable way to create vibrant, edge-to-edge designs on socks and polyester accessories. Since the ink becomes part of the material, the design will never crack, peel, or fade, and there is absolutely no "feel" to the print. This method is specifically designed for white or light-colored polyester fabrics, making it ideal for high-definition, full-color patterns without any expensive screen setup or development costs.*

**7. SILICONE / RUBBER GRIP PRINT (Socks & Gloves)**

*Silicone or Rubber Grip Printing is a functional branding technique where a durable, non-slip liquid silicone material is printed directly onto the fabric surface. It is the most effective way to add anti-slip traction and high-performance grip to products like technical socks, gloves, and sports accessories. These grip prints are designed to withstand frequent use and stretching without losing their adhesive properties or shape. While offering incredible detail for logos and patterns, this method provides a modern, 3D tactile feel that enhances both the utility and the premium look of your functional accessories.*

**8. DTF PRINTING (Direct to Film)**

*DTF Printing is a modern, high-tech process in which designs are digitally printed onto a specialized film and then heat-pressed onto the accessory using a high-quality adhesive powder. It is the most versatile and trending way to achieve full-color, photographic details with a soft, durable finish on your products. Almost all types of accessory fabrics and colors—including cotton, polyester, and blends—are suitable for this process. Since it is a digital method, it is highly efficient for both small runs and bulk orders, offering vibrant graphics without the need for complex screen setups or high development costs.*

**9. 3D RUBBERIZED PATCHES (PVC)**

*3D Rubberized PVC Patches are a modern branding solution where durable and flexible PVC material is molded into a custom 2D or 3D design. This is the most popular way to add bold, rugged logos to bags, backpacks, and technical headwear.These patches are built to withstand extreme weather conditions without losing their shape or vibrant color. Because they offer incredible detail and a premium tactile feel, they are perfect for outdoor and luxury streetwear accessories. Please note, there is a one-time mold development cost to create the unique 3D shape of your logo.*

**10. RHINE STONES PRINTING**

*Rhinestone Printing is a luxury decoration technique where high-quality glass crystals are precisely arranged and heat-bonded onto the material to create a glittering effect. It is the most glamorous way to add a brilliant sparkle and 3D texture to your custom caps, beanies, and high-end fashion accessories.These stones are designed to remain securely attached even with regular use, offering a premium "rich" look. A custom template is required for each design to ensure every stone is placed perfectly according to your artwork.*
